

WIRELESS AUDIO/VIDEO SENDER WITH IR EXTENDER NEW & IMPROVED VERSION MORE COMPACT & NOW S-VIDEO & WITH PRICE REDUCTION!

**NEW!
&
Improved**

**2.4GHz
Wireless**

Want to watch Pay-TV from anywhere in the house?
 Want to broadcast music or a movie house wide?
 Want to control the devices by their remotes?
 This fantastic unit transmits video (RCA/S-VHS)
 & STEREO audio, virtually interference free,
 up to 100M between transmitter and receiver!
 2.4GHz Radio technology with directional
 antennae for excellent picture stability.
 This system is expandable to up to four zones
 using separate RX/TX systems in close proximity
 and as many receiver units as desired (RX2471).
 All units have an IR remote extender feature
 for controlling the AV source at the transmitter.
 Includes power-packs, connecting leads, etc.

Includes Leads (3xRCA)
 And power packs, etc.

Why 2.4 GHz?

NEW
2.4 GHz

OLD
900MHz

Older 900MHz technology experiences interference that degrades picture quality and has limited range.

2.4GHz has a broad signal range which means more video information can be transmitted. You get cleaner pictures, reduced signal interference and multiple channels.

Specifications

• Transmitter	
Output Level	0~10dBm
Frequency Range	2.4GHz~2.4835GHz
Modulation (Audio, Video)	FM
Video Input Level	1Vp-p
Audio Input Level	1Vp-p
Video Input Impedance	75 ohm
Audio Input Impedance	1.4K ohm
Power Supply	DC POWER Adapter Input AC230V, 50Hz Output DC 12V 300mA
• IR Receiver	
Operating Frequency	433.92MHz
Sensitivity	<-100dBm
Carrier Frequency	38KHz
Distance Between RX & TX	≤100ft
IR operation:	±30° horizontal direction
• Receiver	
Video Output Level	0.8Vp-p~1.2Vp-p
Audio Output Level	1.0Vp-p ± 0.2Vp-p
Power Supply DC POWER Adapter	Input AC230V, 50Hz Output DC 12V 500mA
Transmission Distance between Tx & Rx	250ft (L.O.S)
• IR Transmitter	
Output Level	0~10dBm
Frequency Range	433.52~434.32MHz(433.92MHz)
Modulation Type	AM
Frequency Accuracy	75kHz
Tuning Frequency	38KHz
Distance Between TX & RX	≤100ft
IR operation:	±30° horizontal direction

System Requirements

- Video Appliance
- TV
- Remote Controller

Applications

- DSS or Satellite Receiver
- DVD
- TV
- Nursing and monitoring with video camera

Compatible (See MMS) \$49.50

URC6000 is compatible with the TR2470 Remote extender feature

AMPLIFIED SET-TOP ANTENNA

Wide range, general purpose indoor antenna.
Suit VL FM VH UHF. 75Ω PAL Plug terminated.
Includes inbuilt power booster for a 20 → 25dB
signal improvement. Power pack supplied 12Vdc.
Adjustable gain control for optimum picture.
Dual 40" Telescopic Dipole VHF antennae.
Tuneable metal reflective UHF Dish antennae.
Power switch and LED indicator. Black.
Optional external PAL socket for
connecting extra antenna type equipment,
eg. Console game, Cable TV, 2nd Antenna.
Switches / isolates with power switch
(this input signal is not boosted).
Large, sturdy base with foam feet.
Excellent solution for when an indoor
antenna is your only option.
Digital TV compatible.

VIDEO STABILIZER

STANDARD ANALOGUE TYPE - RCA
See page 20-12 of our catalogue.

The CP2 is a composite video type signal
optimiser (RCA) that suits video signal
correction on most pre 2004 video units.

Code
CP2

AS ABOVE - SCART (RGB)

This unit is identical to the CP2 above,
but with SCART sockets for connectors.
Compatible with RGB (Euro-SCART) only.

Code
CP2SRGB

NEW DIGITAL S-VHS VERSION!

For a better quality video signal, the CCR9
has composite and S-VHS. New digital sync re-
compositing technology may also be required
for use between newer videos and especially
recording to DVD-R. A premium quality, hi-res
unit with digital circuitry for best results.

RCA Lead inc. May require S-VHS leads.
Code CCR9
